

WORK SITE ORIENTATIONS

Online Employee Onboarding

Streamline your **organization's onboarding process** by reducing administration and having everything completed before workers show up on site.

Securely Store Orientations
for Remote Access from
Anywhere

Records of Completed
Orientations for Every
Employee

Custom Content Specifically
Designed for Your Business
and Your Safety Policies

Streamline your onboarding process with the latest and greatest innovations in online training.

Let us help you implement adaptive learning that can provide experienced workers with high-level updates, key information, and brand new knowledge while providing new workers all the in-depth information, background knowledge, and learning needed to get up to speed.

Full Customization

Virtual Proctoring

Using the employee's webcam, we can virtually proctor your orientation, ensuring users pay attention to the content and verifying their identity.

Certificate Upload Technology

Workers can upload all their historical training directly into the orientation. These records will automatically populate in their account after being verified by a supervisor or manager.

President's Message

Using technology as simple as a cellphone, it's easy to take a video of the president addressing the team, then upload the message directly into the orientation.

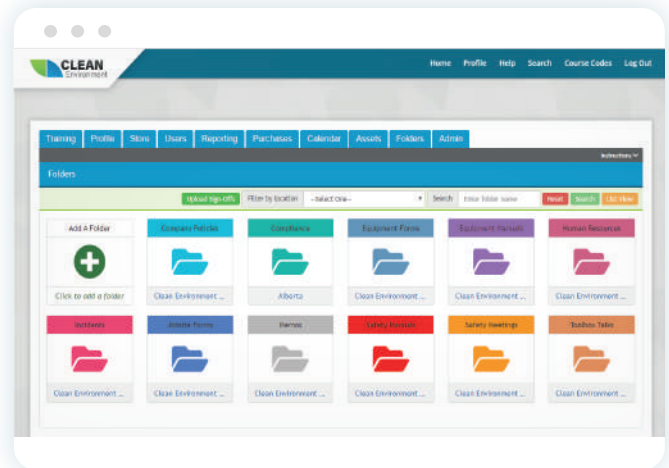

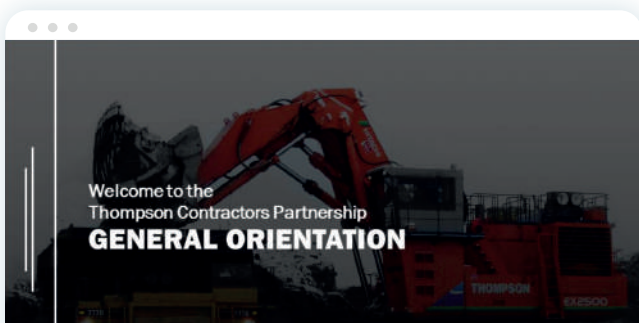

Mainstream Multimedia

Admins can upload your current orientation directly into the system, whether it consists of video, HTML5 files, or PowerPoint slides. Workers can then access it through any Internet-ready mobile device.

SCORM Compliant

Both SCORM 1.2 and 2004 files can be uploaded directly into your orientation for easy access.

Self-Registration

By creating a website link to your orientation, you can have contractors or employees simply click to access the orientation, setting up an account for themselves in minutes.

Exam Engine

Using the system's integrated exam engine, it's easy to pepper questions throughout the material for higher levels of employee engagement and knowledge retention.

Digital Forms

Digital forms can be included as part of the orientation, allowing employees to complete all of their policies, procedures, self-identifications, medial questionnaires, etc. right inside the course.

Collaborative Partnership

The beauty of online orientations is the seamless way the system communicates the training record to your departments. Send your Human Resources department the proper paperwork the second the course is complete. Provide instant verification to the supervisors once training requirements are met. Give gate security an easy way to check if personnel are validated for entry. All of this and more is possible through one, easy-to-use application.
